Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,4, 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacob(US 4,574,247).

The reference by Jacob discloses a non-coherent(no reference input shown in circuit), only FSK modulated input received(Fin). The oversampling device, see figure 4 counter 52 and elements 56,58 which allow for sampling at twice the data rate, see col. 3, lines 35-40 which discusses the general oversampling concept. The following stage, an N-stage counter(ripple or synchronous counter) inherently is formed by a chain of registers(latches that store and transfer the received data bit) serially and then transfers them in parallel to the comparator(62) which serves as the threshold device. As noted in col. 5, lines 50-60, If the number of signal excursions(number of ones value) is less than predetermined value(N) the low level " 0" is produced. On the other hand if the number of ones value is >than the predetermined value(N) then the high level " 1" is produced. The method steps being inherent.

Allowable Subject Matter

4. Claims 2,3,6, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
